

# NEW PRODUCT ANNOUNCEMENT

## Push style conversion clutch system for Corvette 89-96

**Eliminates the factory pull clutch system for unlimited upgradability!**

RAM clutches proudly introduces a system to replace the limited capability pull style clutch/dual mass flywheel system in later model Corvettes. The RAM system consists of aluminum flywheel, Hi-Clamp pressure plate with 2800 pounds clamp load, and your choice of disc to suit your power level. An internal hydraulic bearing replaces the factory release mechanism to complete the install. This system is capable of up to 700 horsepower holding capacity!

YEARS	APPLICATION	PART NO.	SIZE/SPLINE
1989-92	L98	900800	10.5 x 1 1/8-26
1992-93	LT1	900800	10.5 x 1 1/8-26
1994-96	LT1/LT4	900810	10.5 x 1 1/8-26
1989-93	ZR1/LT5	900820	10.5 x 1 1/8-26
1994-96	ZR1/LT5	900830	10.5 x 1 1/8-26

Above sets include 300 series disc and steel ring pressure plate. Add suffix 'X' for 900/300 series disc, 'N' for 900 series disc, suffix 'A' for aluminum pressure ring cover.

NOTE: Eliminating the dual mass flywheel and using the semi-rigid hub in the RAM disc will cause some gear rattle in the driveline under light load.
